-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION*****Specification***

1. The disclosure is objected to because of the following informalities: The uses of Trademarks/Tradenames have been noted throughout this application. The specific name/mark should be in ALL CAPS, followed by either a trademark or copyright symbol and be accompanied by the generic terminology. Although the use of Trademarks/Tradenames is permissible in patent applications, the proprietary nature of the marks/names should be respected and every effort made to prevent their use in any manner, which might adversely affect their validity as a trademark or tradename. To describe physical or other properties of material by mere use of trademark is objectionable since it has tendency to make trademark descriptive of product rather than leaving trademark to serve its traditional purpose, which is to identify product's source of origin. (See Page 6, line 1 TSUNAMI™). Please check the entire specification and properly correct and all trademarks.

***Information Disclosure Statement***

2. The listing of references in the Search Report is not considered to be an information disclosure statement (IDS) complying with 37 CFR 1.98. 37 CFR 1.98(a)(2) requires a legible copy of: (1) each foreign patent; (2) each publication or that portion which caused it to be listed; (3) for each cited pending U.S. application, the application specification including claims, and any drawing of the application, or that portion of the application which caused it to be listed including any claims directed to that portion, unless the cited pending U.S. application is stored in the Image File Wrapper (IFW) system; and (4) all other information, or that portion which caused it to be listed. In addition, each IDS must include a list of all patents, publications, applications, or other information submitted for consideration by the Office (see 37 CFR 1.98(a)(1) and (b)), and MPEP § 609.04(a), subsection I. states, "the list ...

Art Unit: 1771

must be submitted on a separate paper." Therefore, the references cited in the Search Report have not been considered. Applicant is advised that the date of submission of any item of information or any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the IDS, including all "statement" requirements of 37 CFR 1.97(e). See MPEP § 609.05(a). In a nutshell a copy of the cited references have not provided, either in Japanese or English, nor is they're even an abstract to rely upon.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 6183842 in view of JP 62-198455 A (as cited in the search report).

5. USPN 6183842 issued to Shimizu et al discloses making a decorative laminate comprising a substrate layer composed of a polyester type resin layer and a transfer foil laminated to it (abstract, column 4, line 31-column 5 line 5). The resin layer is may be embossed to created concavities to which the foil may be transferred upon (column4, line 63). Shimizu et al does not suggest scaring the resin layer.

As cited in the search report, which at this point the Examiner must believe, is true, since the Examiner cannot obtain the cited reference, nor has Applicant provided the same. However, the cited search report states that in Document 4 (JP 62-198455 under the heading "Effects of the Invention" that scraping is a well know technique and utilized by those skilled

Art Unit: 1771

in the art. Thus, a skilled artisan would have found it obvious to manipulate the surface of Shimizu et al, instead of embossing. One would have been motivated to scrape by hand instead of utilizing a machine embossing treatment motivated by the desire to reduce economical costs in manufacturing said composite.

It should be noted the Merriam Webster's Dictionary defines scrape as

1 a : to remove from a surface by usually repeated strokes of an edged instrument b : to make (a surface) smooth or clean with strokes of an edged instrument or an abrasive

2 a : to grate harshly over or against b : to damage or injure the surface of by contact with a rough surface c : to draw roughly or noisily over a surface. Both of these definitions read on embossing of a surface.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ms. Arti Singh whose telephone number is 571-272-1483. The examiner can normally be reached on M-T 9-5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel Morris can be reached on 571-272-1478. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
